

Faith Community Nursing Literature Reference List

I started the *Faith Community Nursing Literature Reference List* in August 2012 and have continued to add to it, while maintaining it. Faith Community Nursing literature is defined as published research manuscripts, papers, presentations, dissertations, thesis, articles and books. This reference list is composed of APA references arranged in alphabetical order.

Process:

I receive Google Scholar alerts biweekly for both the search terms Parish Nursing (Nurse) and Faith Community Nursing (Nurse). I read to ensure that the piece of literature is indeed addressing or focused on the *Faith Community Nursing* specialty. Many times, I find that terms such as community, faith community, parish, or parish nurse mean other things. Such as, a parish = a district or parish nurse = a public health nurse. I also see that many health activities occur in the faith community but not by or with a Faith Community Nurse. In these cases, the citation is not added. I only add APA citations of Faith Community Nursing literature. If I cannot find the APA citation, I create one. Right now, the citations are in 6th ed. format or 7th ed. APA format. Since 2018, have used highlight colors to indicate the same year. Example: Aqua highlight indicates that the citation is literature published in 2021.

The public can find this list in many different places and are welcomed to use it for scholarship purposes. I would ask that if the public is aware of Faith Community Nursing Literature citations that are not on the list and would like them to be added, please contact me directly at ziebarthdeborah@gmail.com. The *Faith Community Nursing Literature Reference List* was recently updated in 1/2022.

Deborah Ziebarth, PhD, MSN, RN-BC Faith Community Nurse
